Registered Driver Features — SPMP Feature Descriptions

Finalized Feature Set

Registered Driver Features

The following descriptions define the finalized Registered Driver features of the TriSafe (Transportation Safety and Verification System) and are intended for inclusion in the Software Project Management Plan (SPMP).

No.	Feature	Description
1	Home / Dashboard	The Home / Dashboard serves as the main overview screen of the Registered Driver. It summarizes the Driver's account and franchise status, including the Franchise Number and Expiration Date. It also presents the Driver's rating and total passenger reviews, recent notifications, and latest announcement, while providing quick access to frequently used Driver features.
2	Driver Profile	The Driver Profile manages the presentation of the Registered Driver's profile and registered information. It displays the Driver's personal information, Operator Full Name, contact details, address, Account Status, and Body Number / Permit Number. The Driver can update their profile photo, Contact Number, and Address, while official administrative information remains read-only.
3	Vehicle Information	The Vehicle Information feature provides the Registered Driver with access to their official registered vehicle details. It displays the Vehicle Type, Engine Number, Chassis Number, and Plate Number. The information is provided from the official administrative record and cannot be modified by the Driver.
4	My QR Code	The My QR Code feature provides the Registered Driver with access to their officially assigned TriSafe QR Code. The QR Code functions as a backup copy of the Driver's physical QR Code and may be accessed when the physical QR Code is damaged or while the Driver is processing for a new QR Code. The Driver cannot create or modify the official QR Code.
5	Franchise Status	The Franchise Status feature allows the Registered Driver to view their official franchise details. It provides the Franchise Number, Registration Date, Expiration Date, and current Franchise

		Status. The information is controlled by the Administrator/BPLO and is read-only for the Driver.
6	Violations & Penalties	The Violations & Penalties feature provides the Registered Driver with access to official records of violations and associated penalties. It displays the violation, date, offense level, penalty, and penalty status. The Driver can only view these records, while recording and managing the official records remain under the Administrator/BPLO. TriSafe does not process penalty settlement or payment.
7	Notifications	The Notifications feature provides system-generated alerts concerning information or administrative actions relevant to the Registered Driver. Drivers can view notification details, distinguish read and unread notifications, open notifications, and mark them as read. Notifications are generated by the system when approved administrative actions produce Driver-facing information.
8	Announcements	The Announcements feature provides the Registered Driver with access to official information published by the Administrator/BPLO. Drivers can view announcement titles, messages, photos when available, and publication dates and times. The Driver has view-only access to announcements.
9	Rating Statistics	The Rating Statistics feature allows the Registered Driver to view ratings received from Passengers. It presents the Driver's average/current rating and total number of passenger reviews. Ratings are generated from Passenger submissions and cannot be modified or reset by the Driver.
10	Account Settings	The Account Settings feature provides the Registered Driver with account security and application information options. It includes Change Password, About App, Terms & Conditions, and Privacy Policy. The Driver can update their account password and access the provided application information and policies. A Log Out function is also provided for securely ending the Driver's session.

Detailed Feature Descriptions

1. Home / Dashboard

The Home / Dashboard serves as the main overview screen of the Registered Driver. It summarizes the Driver's account and franchise status, including the Franchise Number and Expiration Date. It also presents the

Driver's rating and total passenger reviews, recent notifications, and latest announcement, while providing quick access to frequently used Driver features.

2. Driver Profile

The Driver Profile manages the presentation of the Registered Driver's profile and registered information. It displays the Driver's personal information, Operator Full Name, contact details, address, Account Status, and Body Number / Permit Number. The Driver can update their profile photo, Contact Number, and Address, while official administrative information remains read-only.

3. Vehicle Information

The Vehicle Information feature provides the Registered Driver with access to their official registered vehicle details. It displays the Vehicle Type, Engine Number, Chassis Number, and Plate Number. The information is provided from the official administrative record and cannot be modified by the Driver.

4. My QR Code

The My QR Code feature provides the Registered Driver with access to their officially assigned TriSafe QR Code. The QR Code functions as a backup copy of the Driver's physical QR Code and may be accessed when the physical QR Code is damaged or while the Driver is processing for a new QR Code. The Driver cannot create or modify the official QR Code.

5. Franchise Status

The Franchise Status feature allows the Registered Driver to view their official franchise details. It provides the Franchise Number, Registration Date, Expiration Date, and current Franchise Status. The information is controlled by the Administrator/BPLO and is read-only for the Driver.

6. Violations & Penalties

The Violations & Penalties feature provides the Registered Driver with access to official records of violations and associated penalties. It displays the violation, date, offense level, penalty, and penalty status. The Driver can only view these records, while recording and managing the official records remain under the Administrator/BPLO. TriSafe does not process penalty settlement or payment.

7. Notifications

The Notifications feature provides system-generated alerts concerning information or administrative actions relevant to the Registered Driver. Drivers can view notification details, distinguish read and unread notifications, open notifications, and mark them as read. Notifications are generated by the system when approved administrative actions produce Driver-facing information.

8. Announcements

The Announcements feature provides the Registered Driver with access to official information published by the Administrator/BPLO. Drivers can view announcement titles, messages, photos when available, and publication dates and times. The Driver has view-only access to announcements.

9. Rating Statistics

The Rating Statistics feature allows the Registered Driver to view ratings received from Passengers. It presents the Driver's average/current rating and total number of passenger reviews. Ratings are generated from Passenger submissions and cannot be modified or reset by the Driver.

10. Account Settings

The Account Settings feature provides the Registered Driver with account security and application information options. It includes Change Password, About App, Terms & Conditions, and Privacy Policy. The Driver can update their account password and access the provided application information and policies. A Log Out function is also provided for securely ending the Driver's session.

Final Driver Feature Set

The finalized Registered Driver feature set consists of 10 features: Home / Dashboard, Driver Profile, Vehicle Information, My QR Code, Franchise Status, Violations & Penalties, Notifications, Announcements, Rating Statistics, and Account Settings.
